Profile Summary

Over 7.8+ years of experience, I have been recognized as an efficient and a solution-oriented resource. Having experience of managing and collaborating with small or large teams of developers and designers, system and design integration, web usability planning testing and compliance, white boarding Information architecture and interactive design concepts, database design and design of PHP based solutions. worked at onshore and offshore, closely worked with Client at Amsterdam office for over an year.

- Writing Robust code using PHP, PHP based Frameworks, Joomla Framework, jQuery, HTML5 and CSS3.
- Following MVC/OOP Pattern.
- Designing Database using DBDesigner 4 & PL/SQL.
- Version Controlling of code using GIT (GitHub/BitBucket).
- Manage workflow using tools like JIRA and following Agile Methodology.
- Cloud computing & CDN Setups (Amazon S3, EC2, Cloudflare Cloud & DigitalOcean Cloud) & Their integrations with Applications.
- Designing Architecture for solution as per Requirement Analyses.
- Writing APIs for communication of our project with third party integrations.
- Hands on multiple OS like Windows, Ubuntu, Fedora, CentOS etc.
- Mobile Application API developments & Architectural Designs.
- Worked on Apache & Nginx based server platforms.
- Recruiting Technical & Non-Technical Team.
- Motivational handling of team and helping team members in learning new technologies & their implementations.
- Worked on Multiple APIs Integrations with our Applications like : Mandrill API, MailChimp API, Amazon S3 API, Twitter Connect, Facebook API, Google, OAuth, MixPanel API, Allied Wallet, Paypal API, SMS Gateways, CCAvenue API, etc.
- Expert hands on Bootstrap V3.x.x & V2.x.x (HTML framework & CSS3).
- More than 6-7 custom component in joomla has been designed and developed, including DB structure and architectural design.
- more than 20+ modules were designed and developed as per based on their respective components

Skill Sets

Operating System	<i>Linux (Ubuntu, Fedora, CentOS), Windows (xp, 7, 8.1)</i>
Server Technology Type	<i>Apache, Nginx</i>

Scripting & Markup Languages	<i>PHP, jQuery, HTML5, CSS3, Twitter Bootstrap (2.0, 3.0)</i>
Database	<i>MySQL, MongoDB(NoSQL), MariaDB</i>
Framework	<i>Laravel, CodeIgniter, Zend</i>
Editor tools	<i>Sublime Text, Quanta Plus, ZendStudio, Dreamweaver</i>
DB tools	<i>MySQL WorkBench</i>
Version Control Tools	<i>Git, SVN (GitHub, Bitbucket, Cervisia)</i>
PMS	<i>JIRA, ZOHO</i>
CMS	<i>Joomla, Drupal, Magento, Wordpress</i>
CRM	<i>vTiger CRM</i>
LMS	<i>Moodle</i>
Template Engine	<i>Smarty</i>
Web Service	<i>SOAP, REST, XML-RPC</i>
Caching	<i>Memcache</i>
Other Tools	<i>WinMerge (Merge Tool), SourceTree (Git GUI), Winless(Less tool), DBDesigner 4 (Visual database design tool), FileZilla (FTP tool), Putty (SSH tool), PuttyGen (SSH Keys handling tools), Oracle VirtualBox (Virtual Machine tool).</i>

Experience

IT Team Manager at FashionUnited

December 2009 - Present (5 years & 6 months)

Managing & guiding the team to built different complex applications, Jobs and news portals, professional Networking Application & E-Commerce, using MVC framework. Setting up Cloud servers for production release and Development branching using Rackspace Cloud (CentOS, Nginix, PHP5.5+, MySQL) and DigitalOcean Cloud environments (CentOS, Apache, PHP5.5+, MySQL), Building APIs for third party jobboard integrations (broadbean, multiposting, etc), building the Timelines and procedure to be followed while building the application, writing Libraries to later on used in the application. building complex Database (RDBMS Conceptual) Queries etc. helping team to understand MongoDB & Collections. Several tasks has been executed by me at fashionunited :

- Moving Sites from Shared hosting to Rackspace Cloud hosting with no or minimal downtime.
- Installing required PHP Modules on CentOS (Rackspace cloud).
- Configuration of Nginix for Joomla on Rackspace cloud with PHP-FPM & PHP-Pools setup.
- Designing the Architecture for Applications like Central Jobboard & Central News Board.
- Central News board & Central Jobboard are project to integrate and control 14 portals of FashionUnited Jobs & News Portals from a single joomla setup.
- API written for multiple jobboard to auto post their jobs on FashionUnited Job portals. (broadbean, Gucci, multiposting, hugo-boss, zalando etc).

- Google Analytics integration & Mixpanel for Event tracking for Jobs applications.
- Advance usage of GIT for version control and running multiple branches for hot fixes, development and master branching.
- Issues tracking and Agile methodology using JIRA.
- Setup of Cloudflare to control DNS, SSL.
- Email to content Script for Joomla (this script automatically reads inbox and convert the mail to Joomla content, image attachments are directly uploaded to S3 Buckets (Amazon API).
- Error handling and CSRF attacks preventions within codes.
- Writing Advance SQL (Joins PL/SQL) etc.
- Mobile Application API developments & Architectural Designs.
- Motivational handling of team and helping team members in learning new technologies & their implementations.
- Development of more than 3-4 Custom Components in Joomla like top100, E-Market, fucal with their modules development more that 20 modules have been developed, with DB structural design.
- Implementation of Google DFP with Joomla using custom template parameters.
- Customization of default Joomla looks and feel using Template overrides.
- Customization of Comprofiler, Kunena forums, GroupJive, VirtueMart and their synchronizations.

Sr. Developer at Softsys Global Ltd.

August 2008 – November 2009 (1 Years & 4 Months)

Role to develop code and guide the developer on different open sources and hard-code development, to analyze quality assurance for the web-based solution, designing UML for the complete Solution, Client handling and understand their requirements. Developing Web based solution based over LAMP & Dot-Net using C#. Customization of open sources and development of their modules and plug-in. RSS ticker using XML parsing and news ticker. Server installation for different module of PHP. Implementation of designs successfully into different open sources and development of them if needed then database structure changes were also implemented.

- Client Requirements and Analyses & Solutions projections.
- Customizations of Open Sources like Joomla, Wordpress, Magento, ZenCart, OS-Commerce, etc.
- Custom PHP Programming & database driven applications.
- Payment Gateways integration with different E-commerce projects, development of payment gateways plugins for Magento, VirtueMart, OS-Commerce etc.
- SMS gateways integration with projects.
- PSD To Table less design conversion and integration in open sources.

Worked over different kind of web based solutions, which includes static web solution to dynamic solution, hard coded to open-sources, worked over 6 major projects. Majorly my role was to develop the hard coding for the administrator section and dashboard, beside this the database implementation for the administrator panel. They are comprehensive web-based solution. The environment of these products includes XHTML, XML, CSS, JavaScript, Ajax, PHP, MySQL, Quanta plus Editor, Gimp, Cervisia and Linux (Ubuntu). And along with this we use to test the product for different browser supports also.

- Designing Web pages in Adobe Photoshop or Gimp, and Slicing them into XHTML & CSS.
- Cross Browsers Testing and Support.
- Writing PHP Applications.
- Unit Testing for code & Creating test procedures.
- PSD design using Adobe Photoshop/Gimp.
- Linux LAMP Setup.
- Client Handling and Meetings

Project Undertaken

Project Title	<i>FashionUnited Community portal</i>
Project Duration	<i>December 2009 to Till date</i>
Software/Tools/Technology Used	<i>Jira, GIT, SQL, linux (CentOS), PHP, MySQL Selenium 2, Putty, SourceTree, SublimeText 3, Joomla 1.5, MySQL.</i>
Client	<i>FashionUnited (Amsterdam, The Netherlands)</i>
Role	<i>Team Manager & Lead Solution Developer</i>
Team Size	<i>6</i>
URL	<i>http://www.fashionunited.com/my/</i>

Project Title	<i>FashionUnited Company Directory portal</i>
Project Duration	<i>May 2013 to Till date</i>
Software/Tools/Technology Used	<i>Jira, GIT, SQL, linux (CentOS), PHP, MySQL Selenium 2, Putty, SourceTree, SublimeText 3, Laravel, MongoDB.</i>
Client	<i>FashionUnited (Amsterdam, The Netherlands)</i>
Role	<i>Team Manager & Lead Solution Developer</i>
Team Size	<i>4</i>
URL	<i>http://company.futst.com/</i>

Project Title	<i>FashionUnited Mexican Portal</i>
Project Duration	<i>January 2014 to August 2014</i>
Software/Tools/Technology Used	<i>Jira, GIT, SQL, linux (CentOS), PHP, MySQL Selenium 2, Putty, SourceTree, SublimeText 3, Joomla 3.3.0, MySQL.</i>

Client	<i>FashionUnited (Amsterdam, The Netherlands)</i>
Role	<i>Team Manager & Lead Solution Developer</i>
Team Size	<i>4</i>
URL	<i>https://www.fashionunited.mx/</i>

Project Title	<i>ITC Product Catalogs</i>
Project Duration	<i>March 2014 to June 2014</i>
Software/Tools/Technology Used	<i>Jira, GIT, SQL, linux (CentOS), PHP, MySQL Selenium 2, Putty, SourceTree, SublimeText 3, Joomla 2.5.18, MySQL, VirtueMart.</i>
Client	<i>ITC Electrical Co. (Toronto, Canada)</i>
Role	<i>Team Manager & Lead Solution Developer</i>
Team Size	<i>2</i>
URL	<i>http://www.itcproducts.com/</i>

Project Title	<i>Bahamas Escapades</i>
Project Duration	<i>March 2014 to Till Date</i>
Software/Tools/Technology Used	<i>Jira, GIT, SQL, linux (CentOS), PHP, Putty, SourceTree, SublimeText 3, Joomla 2.5.18, MySQL, com_cars (custom component) com_transport (custom components), Jomres, custom invoices, Allied Wallet Payment gateway, paypal.</i>
Client	<i>Bowes Transport & Travel Ltd. (New Providence, Bahamas)</i>
Role	<i>Lead Solution Developer</i>
Team Size	<i>1</i>
URL	<i>https://www.bahamasescapades.com/demo/</i>

Project Title	<i>Soroptimist International</i>
Project Duration	<i>March 2014 to Till Date</i>
Software/Tools/Technology Used	<i>Jira, GIT, SQL, linux (CentOS), PHP, Putty, SourceTree, SublimeText 3, Joomla 2.5.18, MySQL, Multiple Group And ACL implementations, com_siswp (custom component), com_publicitydatabase (custom component)</i>
Client	<i>Soroptimist International (Melbourne, Australia)</i>
Role	<i>Lead Solution Developer</i>
Team Size	<i>3</i>
URL	<i>http://www.siswp.org/</i>

Above are some of major projects done, so far more than 40+ projects has been successfully executed, FashionUnited itself has 17 portals in multilingual functionalities, have been building them since 2009, some custom components has been built by me like jobboard (central and local), News Board (central & local), Golf management & tour managements (www.pashindia.com), car renting component, Airport transfer component, custom invoice components etc.

Extra Curriculum

MCTS (using C#) Microsoft certified technology specialist

- Microsoft® .NET Framework - Application Development Foundation (070-536).
- Microsoft® .NET Framework 2.0 - Web-Based Client Development (070-528).

- Microsoft® .NET Framework 2.0 - Windows®-Based Client Development (070-526).

Education

Technocrats Institute of Technology, Bhopal

July 2003 – June

2007

Bachelor of Engineering, Electrical & Electronics Engineering

Personal Details

Date of Birth : 10 July, 1985

Gender : Male

Passport no : J3031728 (Valid : 27 Feb, 2021)

Visa : Schengenstates (BNL2) (Expired : 24 Nov, 2011).

Schengenstates (BNL2) (Expired : 24 Nov, 2013).
