Profile Summary

More than 13+ years of experience, I have been recognized as an efficient and a solution-oriented resource. Having experience of managing and collaborating with small or large teams of developers, testers & designers. System and design integration, web usability planning testing and compliance, white boarding Information architecture and interactive design concepts, database structural design and architectural design of various applications. Handled high traffic portals with a 4.5M PVs/day, worked at onshore and offshore, closely worked with client at Amsterdam for over a year.

- ⇒ Managed 10+ diverse projects, 20+ peoples, 3 different application technologies.
- ⇒ Build productive remote software development teams by managing performance using results-based metrics and utilizing tools such as JIRA, and Agile methodology.
- ⇒ Resolved production problems by performing root-cause analysis of work flow issues. Utilized Plan, Do, Check, Act (PDCA) techniques that included work flow analysis, quality assurance, and change management.
- ⇒ Writing robust code using PHP, PHP based Frameworks (Laravel 4,5,6), Python (Flask), Joomla, AngularJS, Grunt, Gulp, Bower, jQuery, HTML5 and CSS3.
- ⇒ Following MVC/OOPs Pattern.
- ⇒ Designing Database using DBDesigner 4 & PL/SQL.
- ⇒ Version Controlling of code using GIT (GitHub/BitBucket).
- ⇒ Cloud computing & CDN Setups (Akamai ion, Akamai NetStorage, Amazon S3, EC2, ElasticCache, RDS, Route53, Cloudflare & DigitalOcean Cloud) & their integrations with Applications.
- ⇒ Designing Architecture for solution as per Requirement Analyses.
- ⇒ Writing APIs for communication of our project with third party integrations.
- ⇒ Integrations of Payment Gateways, SMS Gateways & Third Party APIs with our Applications.
- ⇒ Hands on multiple OS like Windows, Ubuntu, Fedora, CentOS etc.
- ⇒ Mobile Application API developments & Architectural Designs.
Worked on Apache & Nginx based server platforms.
- ⇒ Recruiting Technical & Non-Technical Team.
- ⇒ Motivational handling of team and helping team members in learning new technologies & their implementations.

Skills Sets

Operating System :	Linux (Ubuntu, Fedora, CentOS), Windows (xp, 7, 8, 10)
Scripting & Markup Languages:	PHP 5&7, Python 2&3, jQuery, HTML5, CSS3, Twitter Bootstrap (2.x, 3.x, 4.x)
Database	MySQL, MongoDB(NoSQL), MariaDB
Framework	Laravel 4,5,6, CodeIgniter, Symfony, Zend
Editor tools	Sublime Text 3, Quanta Plus, ZendStudio, Dreamweaver
DB Tools	MySQL WorkBench
Version Control tools	Git, SVN (GitHub, Bitbucket, Cervisia)
PMS	JIRA, ZOHO
CMS	Joomla, Drupal, Magento, Wordpress
CRM	vTiger CRM
LMS	Moodle
Template Engines	Smarty, Java-Velocity, Blade-Laravel
Web Services	SOAP, REST, XML-RPC
Caching	Redis, Memcache
Other Tools	WinMerge, SourceTree (Git GUI), Winless, DBDesigner 4, FileZilla, Putty, PuttyGen, Oracle VirtualBox, HashiCorp Vagrant, Grunt, Bower, Gulp.

Experiences

Sr. Manager – Technology @ ABP Pvt. Ltd.

November 2015 – Present (5 years & 1 month)

Role for Architectural design for News portal application, using Java, python, php, Laravel 5&6, Maven, velocity, Solr, Redis, nginx, hosting architecture along with continuous integration using Jenkins and Git etc. Managing & guiding the team to built different complex applications, news portals. Integration of Schema.org, SEO techniques, Optimization, helping sales team to boost up network and native add networks, collaborating with 3rd parties firm such as Traqli, Marfeel, addthis etc. helping product team to redefine projects, cost and time estimations. Carrying out marketing projects and integrations such as CleverTap, Google GTM, Crazy Egg etc.

- Release management from staging to production using Git & Jenkins with minimum or not downtime.
- Sprint planning for product roadmap releases using Agile Methodology & JIRA.
- Ensure that project timelines will be achieved by appropriate contingency planning in situations of absent staff members or other factors that may impact on project timelines.
- Supervise and assess the work of technical team members in accordance with their role statements.
- Build and create a professional development environment, enhancing the technical, Product and customer facing skills in the technical team to achieve strategic goals in line with the Performance Development Review processes.
- Motivate the technical team by effectively communicating goals and performance expectations, and ensuring team are suitable trained or skilled to meet the demands of their roles.
- Coach team-mates, prioritize work to meet outcomes, monitor workloads, reviews progress of projects and provide feedback where necessary to team-mates.
- Make hands dirty by coding where ever needed.
- Helping Infra-structure team to setup optimized server architectures for running application seamlessly smooth.
- APIs development using CRUD operations.
- Defining Test cases for testing team during code movement from development to staging servers.
- Collaborating with multiple 3rd parties firm for different associations and integrations such as Ventuno, Traqli, Marfeel, Addthis, CleverTap, Google GTM and Crazy egg.
- Recruiting Technical & Non-Technical Team.

IT Team Manager @ FashionUnited

December 2009 – November 2015 (4 years & 11 months)

Managing & guiding the team to built different complex applications, Jobs and news portals, professional Networking Application & E-Commerce, using MVC framework. Setting up Cloud servers for production release and Development branching using Rackspace Cloud (CentOS, Nginx, PHP5.5+, MySQL) and DigitalOcean Cloud environments (CentOS, Apache, PHP5.5+, MySQL), Building APIs for third party jobboard integrations (broadbean, multiposting, etc), building the Timelines and procedure to be followed while building the application, writing Libraries to later on used in the application. Building complex Database (RDBMS Conceptual) Queries etc. helping team to understand MongoDB & Collections.

- Moving Sites from Shared hosting to Rackspace Cloud hosting with no or minimal downtime.
- Installing required PHP Modules on CentOS (Rackspace cloud).
- Configuration of Nginx for Joomla on Rackspace cloud with PHP-FPM & PHP-Pools setup.
- Designing the Architecture for Applications like Central Jobboard & Central News Board.
- Central News board & Central Jobboard are project to integrate and control 18 portals of FashionUnited Jobs & News Portals from a single joomla setup.
- API written for multiple jobboard to auto posts their jobs on FashionUnited Job portals. (broadbean, Gucci, multiposting, hugoboss, zalando etc).
- Google Analytics integration & Mixpanel for Event tracking for Jobs applications.
- Advance usage of GIT for version control and running multiple branches for hot fixes, development and master branching.
- Issues tracking and agile methodology using JIRA.
- Setup of Cloudflare to control DNS, SSL.
- Email to content Script for joomla (this script automatically reads inbox and convert the mail to joomla content, image attachments are directly uploaded to S3 Buckets (Amazon API).
- Error handling and CSRF attacks preventions within codes.
- Writing Advance SQL (Joins PL/SQL) etc.
- Mobile Application API developments & Architectural Designs.
- Motivational handling of team and helping team members in learning new technologies & their implementations.

- Development of more than 3-4 Custom Components in Joomla like top100, E-Market, fucal with their modules development more that 20 modules have been developed, with DB structural design.
- Implementation of Google DFP with Joomla using custom template parameters.
- Customization of default Joomla looks and feel using Template overrides.
- Customization of Comprofiler, Kunena forums, Groupjive, VirtueMart and their synchronizations.

Sr. Developer @ Softsys Global Pvt. Ltd.

August 2008 – November 2009 (1 Years & 4 Months)

Role to develop code, and guide the developer on different open sources and custom development, to analyze quality assurance for the web-based solution, designing UML for the complete Solution, Client handling and understanding their requirements. Developing Web based solution based over LAMP & Dot-Net using C#. Customization of open source technologies and development of modules and plug-in for the same. RSS ticker using XML parsing. Server installation for different module of PHP. Implementation of designs successfully into different open sources and development of them if needed then database structure changes were also implemented.

- Client Requirements and Analyses & Solutions projections.
- Customizations of Open Sources like Joomla, Wordpress, Magento, ZenCart, OSCommerce, etc.
- Custom PHP Programming & database driven applications.
- Payment Gateways integration with different E-commerce projects, development of
- Payment gateways plugins for Magento, VirtueMart, OS-Commerce etc.
- SMS gateways integration with projects.
- PSD To Table less design conversion and integration in open sources.

Software Developer @ Aeon IT Solutions

August 2007 – August 2008 (1 Years & 1 Month)

Worked over different kind of web-based solutions, which includes static web solution to dynamic solution, custom coded applications to open-sources, worked over 6 major projects. Majorly my role was to develop the custom php code for the administrator section and dashboard, beside this the database implementation for the administrator panel. They are comprehensive web-based solution. The environment of these products includes XHTML, XML, CSS, JavaScript, Ajax, PHP, MySQL, Quanta plus Editor, Gimp, Cervisia and Linux (Ubuntu & Fedora). And along with this we use to test the product for different browser supports also.

- Designing Web pages in Adobe Photoshop or Gimp, and slicing them into XHTML & CSS.
- Cross Browsers Testing and Support.
- Writing PHP Applications.
- Unit testing for code & Creating test procedures.
- PSD design using Adobe Photoshop/Gimp.
- Linux LAMP Setup.
- Client Handling and Meetings

Projects Undertaken

Project Title	Anandabazar Patrika News Portal
Project Duration	Nov 2015 – Till date
Software/Tools/Technology Used	Java, SVN, Maven, Velocity, Python 2.7, PHP7, Laravel 5&6, Polopoly, Tomcat, Solr, Jenkins, Zabbix, Nginx, ngx_google_pagespeed, HTML5, CSS3 etc.
Role	Sr. Manager – Technology
Team Size	12
URL	http://www.anandabazar.com/

Project Title	Telegraph India news portal
Project Duration	Nov 2015 – Till date
Software/Tools/Technology Used	Java, APIs, SVN, Maven, Polopoly, Tomcat, Solr, Jenkins, Zabbix, Nginx, ngx_google_pagespeed, HTML5, CSS3 etc.
Role	Sr. Manager – Technology
Team Size	12
URL	https://www.telegraphindia.com/

Project Title	<i>ABP Education Portal</i>
Project Duration	<i>Nov 2015 - Till date</i>
Software/Tools/Technology Used	<i>Laravel 5, nginx, Python 3.5, MySQL 5.6, Gulp, MDBootstrap, Redis, ElasticSearch, Jenkins, Zabbix etc.</i>
Role	<i>Sr. Manager - Technology</i>
Team Size	<i>5</i>
URL	<i>https://www.abpeducation.com/</i>

Project Title	<i>Fashionunited News portal</i>
Project Duration	<i>December 2009 - November 2015</i>
Software/Tools/Technology Used	<i>Joomla, PHP 5.6, MySQL (Percona engine), Nginx, Git, Docker, HTML 5, Material design, Gulp, CSS3, nginx, apache, Meteor (NodeJS), MongoDB, Python 3.5.</i>
Role	<i>IT Team Manager</i>
Team Size	<i>16</i>
URL	<i>https://www.fashionunited.com/, https://www.fashionunited.uk/, https://www.fashionunited.nl/, https://www.fashionunited.de/, https://www.fashionunited.info/</i>

PS: Above are some of major projects done, so far more than 40+ projects has been successfully executed, FashionUnited itself has 17 portals in multilingual functionalities, have been building them since 2009 till Nov 2015, some custom components has been built by me like jobboard (central and local), News Board (central & local), Golf management & tour managements (www.pashindia.com), car renting component, Airport transfer component, custom invoice components etc.

Extra Curriculum

MCTS (using C#) Microsoft certified technology specialist

- Microsoft® .NET Framework - Application Development Foundation (070-536).
- Microsoft® .NET Framework 2.0 - Web-Based Client Development (070-528).
- Microsoft® .NET Framework 2.0 - Windows®-Based Client Development (070-526).

Education

Technocrats Institute of Technology, Bhopal

July 2003 - June 2007

Bachelor of Engineering, Electrical & Electronics Engineering

Personal Details

Date of Birth 10 July, 1985
Gender Male
Passport no J3031728 (Valid : 27 Feb, 2021)
Visa Schengenstates (BNL2) (Expired : 24 Nov, 2011).
 Schengenstates (BNL2) (Expired : 24 Nov, 2013).
